

CARPENTERS SENIOR RECOGNITION PROGRAM

EARNING CERTIFICATES THROUGH CAREER CONNECTIONS

WHAT IS THE CARPENTERS SENIOR RECOGNITION PROGRAM?

The Senior Recognition Program aims to strengthen the nation's talent pipeline by recognizing students who have prepared for rewarding and high demand careers in the construction industry by earning certificates in the Career Connections program.

The program demonstrates students achievements that have earned certificates through Career Connections to their families, peers and communities. Now, more than ever, is it important to show students that they should be PROUD to pick a career as rewarding and in demand as one in the construction industry.

Career Connections is the AP class of construction, it gives students a high-level overview of the basics of carpentry concepts as well as emphasizes strategies that serve as a framework for preparation in advanced training for the apprenticeship program. Upon graduation from Career Connections, graduates earn up to 16 credits at Thomas Edison State University.

WHAT ARE THE BENEFITS OF JOINING THE CARPENTERS APPRENTICESHIP PROGRAM?

Over the years, thanks to the work of our instructors and educators, the Carpenters' Apprenticeship Program has become a college level learning experience. With both in class and on the field training, it prepares students for a career in construction and pays them along the way.

That is why so many Universities and Colleges are partnered with us, and through our Apprenticeship Program, you can earn an associate's degree.
