

# DATA CENTER CONSTRUCTION AND THE CARPENTERS UNION

## SUPPORTING GROWTH, JOBS, AND A SUSTAINABLE FUTURE WITH EVERY DATA CENTER PROJECT

Data center construction is a pressing issue for all local communities across the country. The number of union jobs, tax benefits, and digital innovation that data centers bring to these communities cannot be overstated.

The construction of these facilities creates thousands of well-paying jobs, driven by skilled professionals.

The Eastern Atlantic States Regional Council of Carpenters is committed to working with you to bring responsible data centers to wherever the need exists.

### Looking for:

- A union contractor to partner with on your upcoming data center project?
- The skilled, best-trained workforce to staff your upcoming data center project?
- Help navigating the political and reputational roadblocks that can surface during these projects?

General carpenters, floor layers, interior systems, piledrivers, millwrights, and many more crafts between our 42,000 members are ready to work at a moment's notice on your data centers across West Virginia, Washington, D.C., Maryland, Virginia, Delaware, Pennsylvania, and New Jersey.

Visit [responsibledatacenters.com](https://responsibledatacenters.com) to see how the Eastern Atlantic States Regional Council of Carpenters can be a part of your next construction project in the data center space.

Scan the QR code below to fill out the form on our website and we'll connect you with our signatory contractors.
