Hire the Most Skilled, Cost-Effective Building Maintenance Technicians

Facilities, property managers, and property owners are looking for ways to find skilled workers at a fraction of the cost without losing the quality and talent needed to be on staff and on call for all the problems that can pop up at a moment's notice.

Our Certified Building Maintenance Technicians can meet all your staffing needs.

Our technicians undergo a comprehensive 6-week training program, totaling 240 hours of intensive instructional and hands-on training at no cost to our employers or the industry.

Our Building Maintenance Technicians will be skilled and trained in:

- OSHA 10 certification for construction safety.
- Insulation and repair of framing walls and partitions for various building interiors as well as drywall installation and repairs.
- Taping, finishing, sanding, and preparing drywall surfaces for paint and other wall coverings.
- Installation and adjustment of commercial and residential door systems, including locks, hinges, and closer hardware.
- Trim work, cabinetry, and other fine finish millwork 6. Installation and repair of flooring material including VCT, wood, vinyl, and carpet.
- Ceiling tile installation, repair of existing ceiling grid systems, and installation of new systems.

By choosing our trained workforce for your building, you can expect:

- Reduced onboarding time due to comprehensive pre-employment training and screening.
- Increased productivity, efficiency, craftsmanship and professionalism.
- Adherence to industry safety standards and regulations.
- Versatility in handling various projects.

We recruit from your community, put local hires to work, and train for every situation to provide white-glove service for all your maintenance needs.
