CARPENTER CONTRACTOR TRUST
SMALL BUSINESS CENTER

The Carpenter Contractor Trust believes that the development of both our contractors and our carpenters is essential to the health of our local economies. This is why we have created the CCT Small Business Center - to help build our entrepreneurial minded carpenter members and our signed small contractors into growing and thriving businesses.

We believe a multi-faceted approach is the best way to aid our members and contractors, including:

- Connecting to business and financial planners to help create a plan for their future.
- Planning in-person and virtual seminars on topics that are relevant to a new and growing business.
- Holding meetings between business owners and union representatives to develop a clear path to start and grow a business.
