Pile Driving & Commercial Diving

The Foundation of Union Construction

Experts Above And Beneath The Surface

Whether it be driving steel, concrete, or wood piling into the earth, (Drilling Caissons and Drilled Shafts) Pile Drivers have the skills and certifications needed to ensure the following types of projects begin and end successfully:

- Buildings
- Offshore Wind
- Power Plants
- Highways
- Bridges
- Docks
- Wharfs
- Piers

Commercial Diving

Underwater, commercial divers are capable of working in any body of water or industrial facility that requires:

- Subsurface Inspections
- Demolition
- Salvage
- Welding
- Burning
- Maintenance & Repair Services

Pile drivers lay the groundwork during the early stages of a construction project. They are the marine construction, foundation, and mechanical specialists that have the skills, training, and experience to install and maintain offshore wind turbines in any environment, on time, and in the safest and most cost-effective manner possible. With so much to cover, pile drivers are certified welders and commercial divers, to accomplish underwater construction.
